

Business consulting

Resources management

Our team of specialists are dedicated, seasoned professionals with many years experience of “world class” exposure. Experience gained and developed over many years with major blue chip and public sector organisations.

We have honed the best practice techniques of Lean, Six Sigma, Total Quality Management and incorporated them into a sustainability package – **Resources Management.**

Resources management ensures modern business practices are compliant with and compliment today’s tough environmental recycling and sustainability targets.

Our specialist key areas are;

- e-Commerce
- Environment
- Project Management
- Training & Recruitment
- Production & Logistics Management
- ISO

e-Commerce

This is a real way to reduce cost and overhead in your business. We have the skills to maximise your e-commerce potential, either by designing and developing your in house e-commerce platform, or by our team managing the whole package on your behalf thereby benefitting from our lower cost base and greater resourcing ability. The areas we can help you are;

- Procurement
- Sales
- Marketing
- Document Management & Storage

Environment

So important for us all, and with the Environment Agency now gaining more regulatory powers it is ever more critical that systems and procedures are in place.

We are licensed by the Environment Agency to provide an environmental recycling and refurbishment service allowing you to save cost by increasing sustainability and resource effectiveness.

- Recycling
- Refurbishment
- Sustainability
- Impact assessment
- Environmental Management

Production & Logistics Management

With experience in FMCG, Food, Aerospace, Engineering, Electronics, Petrochemical, Pharmaceutical and IT our team are more than capable of providing solutions, both turnkey and innovative to help you do what you do best – strategically manage your business, while we look after the day to day.

We can even offer a third party production, repack and logistical management solution. Too much overhead and not enough flexibility can be devastating to a business – we can provide the assistance needed to allow you to lower the overhead burden and give you the ability to increase your flexibility.

- Production facilities
- Repacking facilities
- Engineering
- Long & short term storage solutions
- Logistics management
- Transport assistance
- Distribution management

ISO / Legislative compliance

Management assistance and guidance is here and available to help you either achieve ISO accreditation or simply to streamline it and legislative compliance can easily be overlooked. Our team can provide the reassurance you need that this important area will not be overlooked, and the solution provide will be practical, applicable and effective.

- Risk assessment
- Fire risk assessment
- ISO assessment
- ISO implementation
- ISO management

Project Management

From the biggest to the smallest, long time scale to short we are here to assist. Our team have managed all forms of key projects from major business relocation and reorganisation to small office and new business setup; from warehouse and distribution centre setup to bespoke engineering design and installation.

Our knowledge and experience may be that final answer you need to guarantee an on time and on cost fully functional project.

- New capital investment
- Engineering design and commissioning
- Business start up, implementation and assistance
- Project oversight
- Relocation management
- Restructuring and reorganizational change

Training & Recruitment

New projects means new skills are required, what better than for the project management company to identify and provide the training solution and where needed help recruit the skilled people needed.

Recruitment should not be a shot gun approach; our experience in a cross section of top industries allows us to provide the right solution for your needs. Our team know the right questions to ask and will get you a candidate who will meet your requirements perfectly.

Training should be tailored to your requirements, and not generalised across the business. We can correctly assess what training is needed, if at all, to maximise the potential of your staff.

- Accredited training provision
- Bespoke recruitment

Resources management

Cost and overhead reduction; management of both are so important for your business to optimise profitability. We offer a broad range of solutions. We are experienced in implementing, and more importantly ensuring the continued running of business efficiency techniques like lean management, TQM and world class manufacturing.

Additionally one of the biggest burdens on industry is the back office function; whole departments are created just to manage paper and documents. We can solve this overhead burden by providing you with everything from secure document storage to a complete management of your back office function, allowing you to focus on your key business areas and concentrate your staff on income generation.

- LEAN
- TQM
- Back office management
- Quality management
- Document storage & retrieval
- Secure document destruction
- Purchasing
- Asset management
